TACTICAL EMERGENCY CASUALTY CARE

FOR LAW ENFORCEMENT & FIRST RESPONDERS

TECC

TACTICAL EMERGENCY CASUALTY CARE

FOR LAW ENFORCEMENT & FIRST RESPONDERS

In this course you will learn the current, correct, immediate interventions for critical trauma injuries.

You will learn and practice these critical life-saving skills:

- Rapid MARCH trauma assessment
- Response, threat, and priority concepts
- Extremity and junctional bleeding control
- Care for burns from Direct Fire Attack
- Bag-Valve-Mask ventilation
- Nasopharyngeal airways
- Traumatic hypothermia management
- Rescue Task Force concepts
- Tourniquet application and management
- Hemostatic application and management
- Penetrating chest wound management
- Circulation and wound management
- Opiate exposure and Narcan administration
- Emergency moves and rescues
- Prolonged care concepts
- Mass Casualty Incident concepts

When every second counts, if you don't KNOW and don't DO everything that is needed, rapidly and correctly, someone DIES.

These skills are REQUIRED.

Prepare, Train, Be Ready

Includes TECC course textbook, course certificate, and CAPOST credit for CA LE.
