Tactical Emergency Casualty Care
for Law Enforcement & First Responders

SWIFT TACTICAL
Prepare, Train, Be Ready

Friday, December 10, 2021, 0700-1600
LA HIDTA 5801 E Slauson Av, Commerce

Critical traumatic injuries can be rapidly fatal, before the arrival of EMS and advanced care. Immediate action must be taken to preserve life, by those already at the scene.

Based on the current guidelines of the Committee for Tactical Emergency Casualty Care (C-TECC), this CA POST certified provider course will give you the knowledge, the skills, and the confidence to save your life, or the life of another, during an active trauma emergency.

You will learn and practice these life-saving skills:

- **Mass Casualty Incident response, triage, and rapid care of critical penetrating, blunt, and blast trauma injuries**
- **Rapid trauma assessment**
- **Emergency moves and rescues**
- **Care for traumatic hypothermia and shock**
- **Tourniquets**
- **Hemostatics**
- **Pressure Bandages**
- **Occlusive Chest Seals**
- **Nasopharyngeal Airways**
- **Bag Valve Mask Ventilation**
- **Narcan**
- **Pulmonary management**
- **Prolonged care concepts**
- **Heat management**

These skills were incorporated into the standard scope of practice for CA Law Enforcement in 2015, and are required by CAPOST and CAEMSA. This comprehensive course provides an understanding of physiology, injury mechanics, and treatment protocols for traumatic injuries, through in-depth lecture and hands-on practice, drills, and scenarios. You will learn advanced treatment skills, why and how they are effective, what equipment is necessary, and why these skills are critical for everyone currently working in emergency response and public services.

Tuition: $150
- Each student will receive 8hrs CAPOST credit and course certificate

Tactical Medical Solutions Patrol Trauma Kits are available for purchase

Authorized Vendor
TACTICAL MEDICAL SOLUTIONS

Instructor: Jason Ames retired in 2021 from full duty service with the Los Angeles County Sheriff's Department, with 25 years of experience in patrol and custody operations, last assigned as a detective at Palmdale Station. Jason is a CAEMSA certified Emergency Medical Technician, and continues to serve as an EMT on LASD's Search and Rescue Team. Jason is a CA POST certified Academy and First Aid/CPR/AED/TECC instructor and continues to instruct courses for LASD personnel.

Jason is a certified NAEMT Training Site Coordinator, Instructor, and Provider for Tactical Emergency Casualty Care for Law Enforcement & First Responders (TECC-LEO), Tactical Combat Casualty Care - All Combatants (TCCC-AC), Prehospital Trauma Life Support (PHTLS), Bleeding Control for the Injured (B-CON), All Hazards Disaster Response (AHDR), Geriatric Education for EMS (GEMS), and Psychological Trauma in EMS Patients (PTEP) courses.

Jason is certified by the Department of Homeland Security as an Active Shooter Threat Instructor and a Tactical Medical Instructor, and is recognized by the Committee for Tactical Emergency Casualty Care (C-TECC) as a TECC instructor, adhering to their national TECC guidelines.
